Annual Medicare Program Statistics

The Health Care Financing Administration (HCFA) is responsible for the Medicare program and Federal participation in State-operated Medicaid plans. HCFA's mission is to finance "...the timely and economic delivery of appropriate health care to eligible beneficiaries." HCFA reimbursement policies have significant and far-reaching effects on providers, beneficiaries, and payers. Understanding these effects and their causes is essential to the planning and implementation of cost-saving initiatives.

Within HCFA, the Bureau of Data Management and Strategy (BDMS) is responsible for the development of systems and computer programs to establish and maintain the national Medicare statistical files. BDMS develops and coordinates agency statistical methods for the economic analysis of health care financing issues and proposals.

This *Annual Medicare Program Statistics* report contains data on Medicare enrollment. The data can be useful to health care managers, planners, and researchers, particularly for those examining cost-saving alternatives for health care delivery methods, such as capitation.

20. Number of disabled persons enrolled in hospital and medical insurance, by population size groups of metropolitan statistical areas (MSA's) and each area of 500,000 or more in 1985, type of coverage, race, and sex: July 1, 1987 129

21. Number of disabled persons enrolled in hospital and medical insurance, by type of coverage, age, race, sex, and month of coverage: July 1, 1987 134

22. Number of disabled persons ever enrolled in hospital and medical insurance, by age, area of residence, census region, division, race, and sex: July 1, 1987 136

Definitions 141

Trends

Medicare enrollment

Medicare enrollment data provide information on the aged and disabled populations covered by the hospital insurance (HI) and supplementary medical insurance (SMI) parts of the Medicare program.

Data on the characteristics of the enrolled population are as of July 1, 1987, unless otherwise noted. Changes in enrollment over the years are highlighted. Text tables are presented that include trend data and a variety of other enrollment data not included in the detailed tables.

All persons

- On July 1, 1987, 32.4 million aged and disabled persons were enrolled for HI and/or SMI. At the beginning of the Medicare program in 1966, 19.1 million aged persons were enrolled.
- Total enrollment in 1987 increased 2.1 percent over the 31.7 million enrollment in 1986.
- In 1987, Medicare enrollees residing in the United States represented 13.0 percent of the total resident population; in 1966, they represented 9.6 percent.
- More than 98 percent of the total Medicare population was enrolled in HI during 1987; similarly, more than 96 percent of this population was enrolled in SMI.
- During 1987, over 2.3 million persons were newly enrolled in HI and in SMI.
- In 1987, HI enrollment showed 1.6 million persons or 97.5 percent were terminated because of death. Under SMI enrollment, 93.7 percent were terminated because of death.

Aged persons

- Enrollment of aged persons under Medicare has increased from 19.1 million in 1966 to 29.4 million in 1987 (2.1 annual percent change). The increase in enrollment of the aged was 2.0 percent from 1986 to 1987.
- Approximately 97 percent of the total U.S. population 65 years of age or over had some type of Medicare coverage in 1987.
- Persons eligible for social security benefits accounted for 82.1 percent of all aged HI enrollees in 1966 and 96.1 percent of all aged HI enrollees in 1987.
- Enrollment of the aged in HI grew from 19.1 million in 1966 to 28.8 million in 1987, a 2.0 annual percent change. SMI enrollment grew faster (17.7 million enrollees in 1966 to 28.4 million enrollees in 1987). This increase in SMI enrollment represents a 2.3 annual growth rate.
- The number of aged persons with SMI coverage only rose from 26,000 in 1966 to 558,000 in 1987. In 1987, SMI enrollment represented 1.9 percent of the total aged Medicare population.
- Under HI, persons 85 years of age or over accounted for 10.5 percent of the total enrollment of the aged in 1987, up from 6.2 percent in 1966. This age group had the highest annual percent change (4.6) since 1966. Similar patterns emerged under SMI.
- In 1987, 6 out of 10 aged enrollees under HI or SMI were female. Since 1966, the percentage of enrolled females has increased steadily.
- From 1966 to 1987, the annual percent change in aged female enrollment under SMI was 2.5 percent as compared with the 1.9 percent for aged males enrolled.
- From 1966 to 1987, aged HI enrollment increased faster for persons of races other than white (2.8 annual percent change) than for white persons (1.9 annual percent change). For both HI and SMI, persons of races other than white accounted for more than 9 percent of the aged Medicare population of known races.
- In 1987, the highest proportion (33 percent) of the aged U.S. Medicare population resided in the South; the lowest proportion (18 percent) resided in the West.
- From 1966 to 1987, the enrollment growth of aged HI enrollees was highest in the West (2.8 percent per year) and the South (2.7 percent per year). The lowest HI enrollment growth was in the Northeast (1.2 percent per year).
- Under SMI enrollment, the growth in the number of aged enrollees was highest in the West (3.1 percent per year), and lowest in the Northeast (1.4 percent per year).
- In 1987, more than 54 percent (15.3 million) of the aged HI population resided in metropolitan areas having a central city.
- During 1987, nearly 2 million aged persons were newly enrolled in HI and in SMI.

Disabled persons

- In 1987, 3.0 million disabled persons were enrolled in HI compared with 1.7 million whose enrollment started in 1973.
- Although the annual rate of growth in the number of aged enrollees remained relatively constant (about 2 percent a year), the pattern of growth for the disabled was erratic. The rate of change for the disabled peaked in 1975, then declined rapidly, and for the first time since 1981 has shown a positive increase (Figure 1).
- In 1987, 46.2 percent of disabled enrollees were 55–64 years of age; 28.1 percent were 60–64 years of age.
- From 1973 to 1987, the enrollment of disabled beneficiaries 35–44 years of age increased faster than those enrolled in any other age category.
- Unlike the aged Medicare population composed mostly of females, the majority (63 percent) of disabled enrollees were males.
- In 1987, 8 out of 10 persons in the disabled Medicare population were white. Enrollment of disabled persons of minority races has more than doubled from 1973 to 1987.
- During 1987, more than 53 percent of disabled HI enrollees lived in metropolitan areas having a central city; more than 1 out of 3 of these enrollees resided in the South.
- During 1987, more than 6 percent of disabled enrollees attained 65 years of age and were converted automatically to aged status.
- About 1 percent of disabled enrollees recovered from their disabilities and they were terminated from the Medicare program.

Persons enrolled under State buy-in agreements

- In 1987, 3.0 million persons were enrolled in SMI under State buy-in agreements. These enrollees constituted 9.7 percent of the total SMI population.
- For aged beneficiaries, the number of SMI buy-ins increased from 1.1 million in 1967 to 2.3 million in 1987. In 1967, buy-ins represented 6.3 percent of the total aged SMI population; in 1987, they represented about 8.3 percent.
- Disabled beneficiaries enrolled under State buy-in agreements have grown in number from one-quarter million in 1973 to nearly two-thirds million in 1987. In 1973, buy-ins represented 16.0 percent of the U.S. disabled SMI population; in 1987, they represented 23.7 percent.
- In 1987, the States having the highest percent of buy-ins relative to their total SMI populations were Mississippi (25.4 percent), California (19.5 percent), and Alaska (18.2 percent). Those with the lowest percent of buy-ins were New Hampshire (2.5 percent), Minnesota (3.1 percent), Nebraska (3.1 percent), and Illinois (3.3 percent).

Definitions

Program-related terms

Aged beneficiaries—Persons 65 years of age or over are included in this category if they are: entitled to monthly Social Security Administration (SSA) benefits or payments from the Railroad Retirement Board (RRB); uninsured for SSA or RRB benefits but transitionally insured for Medicare; or not included in the above groups but purchase hospital insurance (HI) and supplementary medical insurance (SMI) coverage. Persons 65 years of age or over identified as having end stage renal disease (ESRD) are included.

Disabled beneficiaries—Persons under 65 years of age who are entitled to SSA disability benefits for at least 24 months, including those receiving SSA disability benefits and identified as having ESRD and those deemed disabled solely because of ESRD, are considered disabled beneficiaries. Disability beneficiaries are further classified according to the type of disability entitlement under SSA: disabled workers, adults disabled as children, or disabled widows and widowers.

Change in benefit status—When disabled beneficiaries attain age 65, they are reclassified as aged persons.

Type of coverage—Medicare provides two basic types of insurance: a hospital insurance plan and a voluntary supplementary medical insurance plan. Most aged persons may be covered by either one or both plans. However, those aged persons paying a premium for HI coverage must also enroll for SMI coverage. Disabled persons may not enroll for SMI coverage without HI coverage, except in circumstances where entitlement was awarded through Government error that warranted equitable relief.

Mid-point enrollment—Enrollment as of July 1 has been chosen as the denominator for utilization rates published in this Medicare data series. The choice was based on the similarity of the July 1 enrollment to a 12-month average enrollment.

Persons ever enrolled—Persons eligible for benefits at any time during a calendar year.

Geographic classifications

All areas—Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

All other areas—Consists of American Samoa, Canton Island, Caroline Islands, Guam, Northern Mariana Islands, Marshall Islands, Midway Islands, Virgin Islands, and Wake Island.

Metropolitan and nonmetropolitan counties—The division of counties into metropolitan and nonmetropolitan groups is based on the list of metropolitan statistical areas (MSA's), published by the Office of Budget and Administration. Except in New England, each MSA includes a county that contains a central city of at least 50,000 inhabitants, based on the 1980 census. In addition, contiguous counties are included in the MSA if they meet certain criteria of economic and social integration with the central city. In New England, an MSA consists of towns and cities rather than counties. However, the mailing address on the master enrollment record file is coded only for State and county. Therefore, for New England, the MSA was replaced by the New England county metropolitan area (NECMA), which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an MSA or a NECMA. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an MSA nor a NECMA.

Place of residence—The beneficiary's place of residence classification is a mailing address, not necessarily an actual place of residence. Some beneficiaries have their checks mailed to a post office or to a representative payee in a State or county that may differ from the residence of the beneficiary. Temporary or permanent changes in address are recorded as beneficiaries report them. Only the most recently reported mailing address is on the master enrollment record file. The address on the date of tabulation kept on file is used for all tables in *Medicare Enrollment, 1986–87.*

State unknown—There were 18,000 aged and 2,000 disabled persons with unknown State of residence recorded on the master enrollment record file in 1987. Most of the entries for the aged were the result of processing errors of codes for State or foreign countries. Most of the unknown State of residence records for the disabled were incomplete because temporary enrollment records were established for persons with end stage renal disease.

United States—Consists of the 50 States, the District of Columbia, and residence unknown.

Demographic classifications

Age—Ages for all persons alive at the end of a year are calculated as of July 1 of that year. For persons dying during the year, ages are calculated as of the first day of the month of death. In tables showing enrollment by month of coverage, ages for all persons alive at the end of a year are calculated as of the reference month shown in the body of the table.

Race—Categories include white, all other races, or unknown, as entered on the master enrollment record file from basic records completed by the beneficiary. A race distribution is shown for an MSA if at least 10 percent of the hospital insurance beneficiaries are classified as "all other races."

Race unknown—Race unknown, whether or not displayed in a table, is included in the all persons or equivalent totals. On July 1, 1987, the number of aged HI beneficiaries without a race designation was about 910,000. Race was not known for almost 57,000 disabled persons (primarily RRB beneficiaries). The relatively high proportion of RRB beneficiaries without a race designation is caused from incomplete data exchange procedures.

Sex—As recorded on the master enrollment record file.
